**Subject:** Rep. Ann Kirkpatrick Chief of Staff Inquiry: Lake Powell

Harry/Enrique -

Are the questions being raised by Rep. Ann Kirkpatrick's office something that you or someone on your staff can respond to? I would like to be as responsive to the Congresswoman's Chief of Staff as we can be. Here are the two questions she raised. It would be nice if I could provide her with some responses as soon as possible. I sent them to Rusty in the JIC, but he was not sure they would be able to respond to these questions. Any help on these would be most appreciated. Thanks.

1) Getting questions from folks on the ground about what exactly being done by the EPA to prevent the contaminated water from making its way into Lake Powell. Do you have a couple specific examples that I can report back on?

2) Folks are asking if EPA officials are going to be at the confluence of the San Juan River and Lake Powell - building barriers and sludge nets. We hearing from the local elected officials and chamber of commerce.

Importance: High

Rusty -

Please see attached inquiry from Rep. Ann Kirkpatrick's Chief of Staff, Carmen Gallus. She is asking about what exactly is being done by the EPA to prevent the contaminated water from making its way into Lake Powell. Please let me know if this inquiry can be addressed by the JIC?
